Key Issues

Financial companies involved in investment or asset management activities have the duty to act in the best long-term interests of their beneficiaries. The adoption of a responsible investment strategy, considering ESG aspects in investment decisions can be a critical factor to fulfil this fiduciary duty. At the same time, the integration of ESG aspects in the governance and control systems of the financial companies themselves can result in a better understanding and monitoring of ESG risks inherent to the company investment strategy and investee companies.

Company Performance

Due to the lack of reporting, AFP Habitat's performance in Responsible Investment is weak.

- Information on how ESG aspects are integrated in its corporate governance structure is not disclosed.
- Furthermore, Habitat does not disclose an investment policy covering ESG aspects, nor does it report on investment strategies that may take into account ESG considerations.
- As such, there is no information on how the assessment of investee companies' ESG performance may be integrated by Habitat in its investment decision making process.
