Key Issues

Financial companies involved in investment or asset management activities have the duty to act in the best long-term interests of their beneficiaries. The adoption of a responsible investment strategy, considering ESG aspects in investment decisions can be a critical factor to fulfil this fiduciary duty. At the same time, the integration of ESG aspects in the governance and control systems of the financial companies themselves can result in a better understanding and monitoring of ESG risks inherent to the company investment strategy and investee companies.

Company Performance

AFP Integra's performance in Research in Sustainability is limited.

The Company conducts exclusionary screening, not investing in sectors or activities stipulated in the Responsible Investment Policy and ethical principles upheld by Grupo Sura. In addition, AFP Integra provides trainings to new employees in ESG issues and manage procedures in investment decision. However it does not disclose if the company use more ESG strategies such as positive screening or Company engagement for instance.
