Key Issues

Financial companies involved in investment or asset management activities have the duty to act in the best long-term interests of their beneficiaries. The adoption of a responsible investment strategy, considering ESG aspects in investment decisions can be a critical factor to fulfil this fiduciary duty. At the same time, the integration of ESG aspects in the governance and control systems of the financial companies themselves can result in a better understanding and monitoring of ESG risks inherent to the company investment strategy and investee companies.

Company Performance

Andino AM's performance in Research in Sustainability is limited.

Andino AM conducts exclusionary and positive screening within its portfolio. In addition, the Company also manages procedures in investment decision which include dedicated training for analysts. Besides this, the company does not report on other ESG investment strategies within its portfolio, such as thematic funds or engagement with companies for instance.
