### Key issues

Companies seeking to attract international investors or to have them remain as shareholders are expected to maintain a sustainable and transparent relationship with these capital markets players. Investors and analysts should be able to access detailed and updated information as regards the company's financial performance, as well as regarding its medium to long-term strategy and related quantitative targets. Furthermore, it is also key for a company to report on its strategy and performance on Environmental, Social and Governance aspects. Such information should be made accessible through communication channels such as reports or dedicated pages on the website, while an investor relations team or department would be set up within the company.

### Company performance

BBVA Banco Continental achieved a weak performance on its Investor Relations issues. The company describes most of the key elements of the general context of its markets. However, only quarter financial results are disclosed in English. In addition, the website, information on corporate governance and all remaining documentation, such as the ESG report, are only available in Spanish. This means that international shareholders have no access to relevant information as regards the financial health of the company.

\* On a 4-level scale: proactive, responsive, partially responsive, not responsive
